Helen and Newton Harrison (UCSD, Emeriti, Ecological Visual Arts)
**"Complexity Works: Rain Forest / Meadow / Eco-Urban Edge / Glacial
Melt and Sponge"**

Abstract: We present four illustrative projects in which we have been invited to intervene on a large ecological scale in the aftermath of massive resource extractions from diverse environments whose sustainability is profoundly compromised. Each work proposes a response and new proposal to four different large systems at risk. These are the North American Rain Forest, the Endangered Meadows of Europe, the Green Heart of Holland, and the water sources of Peninsula Europe in relationship to global warming and glacial meltdown. Includes discourse, presentation of readings & imagery, discussion.

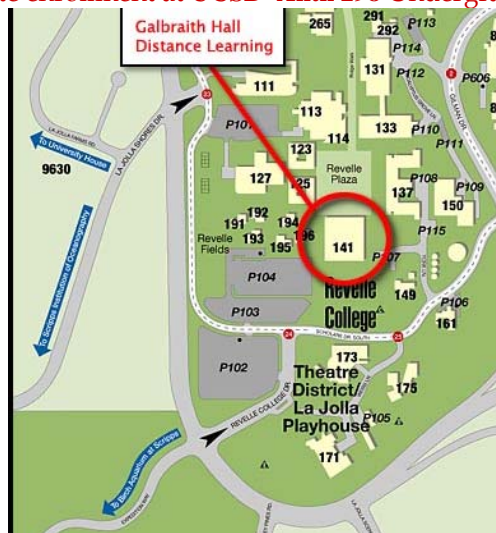

WINTER QUARTER REGISTRATIONS

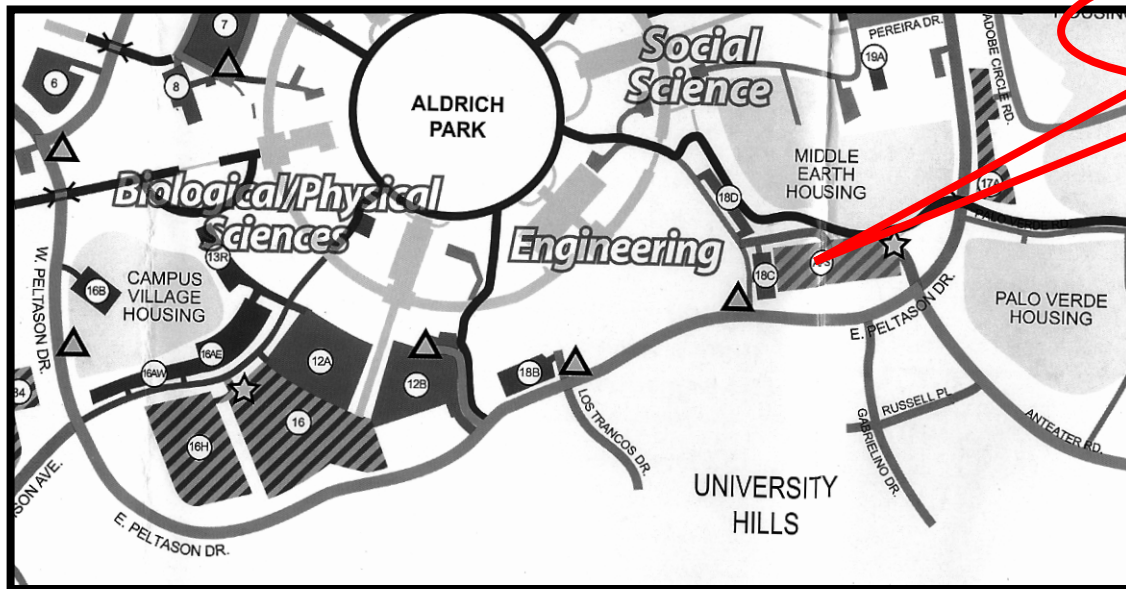

Grad and undergrad enrollment at UCI **SocSci 240B**

Graduate enrollment at UCLA **Anthro 294** Undergrad **Anthro M193P/HCS M193P**

Grad and undergrad enrollment at UCR **Poli Sci 293**

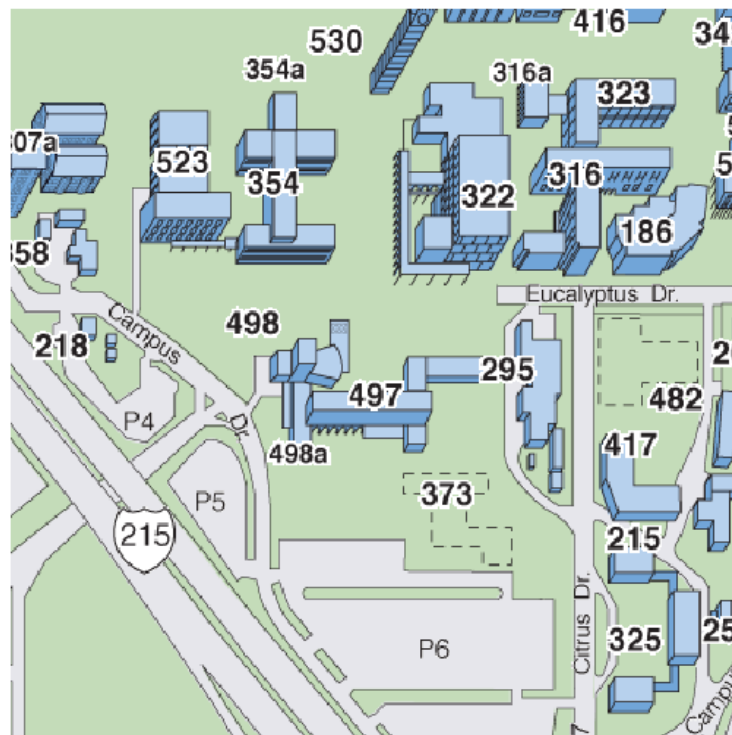

Graduate enrollment at UCSD **Anth 298** Undergrad **Anth 199**
