

# **Using SPSS: Analysis and Comparison in the Social Sciences**

*with the Standard Cross-Cultural Sample Database CD-ROM*

Douglas R. White, Andrey Korotayev and Daria Khaltourina

2003 ms. In preparation

# **Table of Contents**

## **Acknowledgements**

### **1 Cross-Cultural Research: An Introduction**

### **2 Cross-Cultural Research with the Standard Sample Database: Starting up**

### **3 How To Do Scatterplots and Maps in SPSS 10.0/11.0**

### **4 How To Do Cross-Tabs in Spss 10.0/11.0**

### **5 Statistical Analysis of Cross-Tabs**

### **6 Reading Cross-Tabs**

### **7 Reliability and Validity: One Factor and Third Factor Tests**

### **8 Galton's Problem**

### **9 Conclusion**

### **10 Bibliography**

### **11 Appendix: A Course in Cross-Cultural Research**

## Detailed Table of Contents

### Acknowledgements

#### 1 Cross-Cultural Research: An Introduction

What is Cross-Cultural Research?  
Cross-Cultural Research: A Short History  
The SCCS and Standard Sample Spss Database  
Problems of Cross-Cultural Research  
Cultural Coherence or Decoherence within and between Communities:  
    Human Behavior, Beliefs and Institutions  
Avoiding Pet Theories  
Test the Alternatives  
The Standard Sample and a Cumulative but Eclectic Science

#### 2 Cross-Cultural Research with the Standard Sample Database: Starting up

*Section 1: Finding Variables*  
*Section 2: Working with the database*

#### 3 How To Do Scatterplots and Maps in SPSS 10.0/11.0

*Section 1: Making Scatterplots to Test Relationships between Variables*  
*Section 2: Making Maps*

#### 4 How To Do Cross-Tabs in Spss 10.0/11.0

Getting variables from a spss file  
Asking for percentages  
Asking for statistics  
Getting your table  
Exporting your table to word or html  
A better way to export your table to word or html

#### 5 Statistical Analysis of Cross-Tabs

Introduction  
*Section 1: Measurement and Correlation*  
Measurement  
    Nominal, Ordinal, Interval and Ratio Scale Variables  
Correlation  
    Functional and Correlational Relationships  
    What do Correlations Mean?  
    Functional Coefficients (interval or ordinal variables or 2 x 2 tables)  
    Relational Correlation Coefficients: Order- and Category-Based  
    Order-Based Correlation Coefficients (Ordinal variables and 2 x 2 tables)  
    Categorical Correlation Coefficients (Nominal variables and 2 x 2 tables)  
    What does the Strength of a Correlation Mean?  
*Section 2: Using the Analytic Power of Statistics*  
Probabilistic Inference  
    Law of independent events  
    Law of sample spaces  
    Law of exclusive events  
Expected Frequency and the Null Hypothesis  
    Expected Probability  
The Chi-square ( $\chi^2$ ) statistic for measuring departure from the Null Hypothesis of Statistical Independence  
Converting Chi-square into a Test of Significance

Degrees of Freedom  
Significance Tests: The Chi-square approximation and alternatives  
Building on Chi-square: The all-purpose Phi Coefficient  
The Phi-square correlation coefficient  $\Phi^2$  and adjusted  $\Phi'^2$   
Assigning a Positive or Negative sign to the Phi' correlation coefficient  $\Phi'$   
Evaluating Cross Tabulations of Nominal Variables  
Evaluating Cross Tabulations of Ordinal Variables  
Evaluating Cross Tabulations of Categorical Variables  
Fisher Exact Significance Test  
Fisher Exact Test for 2 x 2 Cross Tabulations  
Fisher Exact Test for up to 6 x 6 Cross Tabulations  
Fisher Exact one- and two-tailed Test and Data-Mining Errors  
*Section 3: Evaluating Correlations and Models*  
Significance  
Sample Size  
Conclusion  
Review  
Summary  
References  
Appendix 1: Interpreting Gamma Coefficients

## **6 Reading Cross-Tabs**

## **7 One Factor and Third Factor Tests**

## **8 Galton's Problem**

## **9 Conclusion**

## **Acknowledgements**

Our thanks go to Patrick Gray for helpful commentary on earlier drafts, to William Fitzgerald who went over Chapter 5 in great detail, and to Birgit Paukzstat for suggestions on Chapters 2-5. Thanks are also due to the students in Anthropology 174AW, World Cultural Comparisons, fall 2002, University of California, Irvine who provided useful feedback at the end of the class on what would be useful as an additional orientation package for this class, for which all the teaching materials are now available on-line at URL <http://eclectic.ss.uci.edu/~drwhite/undergrad.html>. The fall 2003 World Cultural Comparisons students will be the first to use this text and we will appreciate any and all feedback received from them.
